## Free Plugins

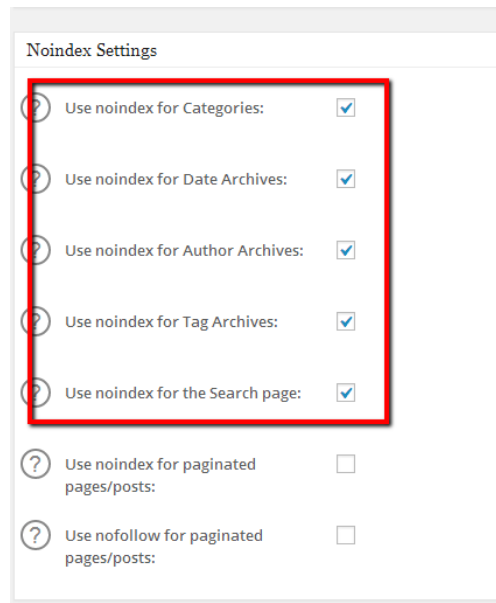

1. **Link Juice Keeper** – Redirects all the link juice from inner pages to your home page.
2. **Google XML Sitemaps** – Allows for quick indexing. Once installed, the sitemaps will be created automatically.
3. **Google XML Sitemap for Videos** – Allows for quick indexing

Make sure to put a YouTube video on the pages you want indexed quickly. Then head on over to Tools > Sitemap and click "Generate Sitemap".

4. **All in one SEO pack / Wordpress SEO by Yoast** – Allows noindexing of tags and categories and SEO optimization

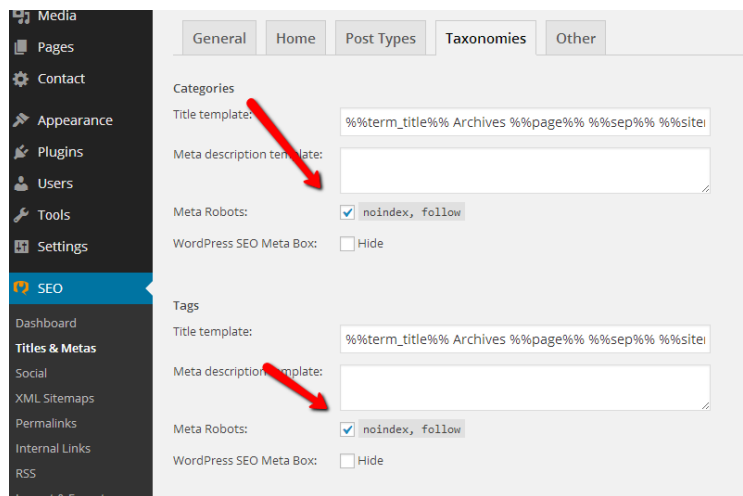

If you're using All in One SEO:

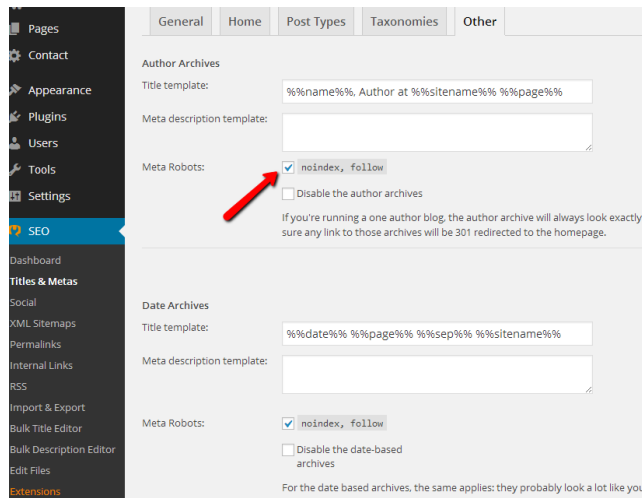

In addition to filing in all the Title and Meta tags, make sure to noindex tags and categories. Do this by going to the All in One Plugin section, and ensure the following are ticked:

If you're using Wordpress SEO by Yoast:

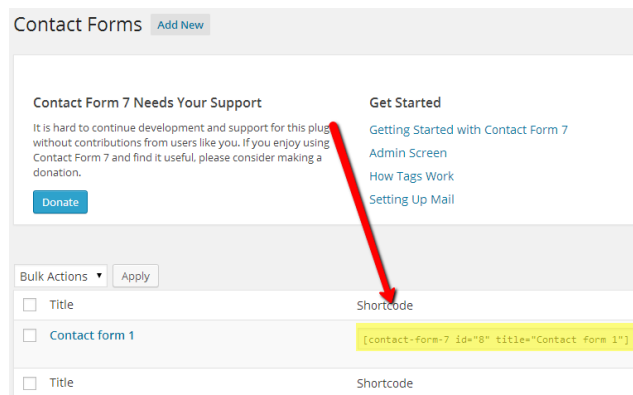

In addition to filling in Titles and Meta Tags, go into the *Titles & Meta's* section and ensure the following are checked:

5. **Contact Form 7** – Easily create a contact form to make your site look legitimate

Go to the “contact” section that was newly added from installing the plugin. Copy the shortcode and paste this into your contact page.

6. **WordFence / iThemes Security** – Wordpress Security plugins

7. **Akismet** – prevents spam comments. Otherwise the plugin “Disable Comments” works well too

8. **Google Privacy Policy / WP-Insert** – Creates privacy policy, terms of service, copyright and other legal pages to make your site look more natural
